

Calibration Module

Ensure accuracy and reliability of equipment through systematic calibration management

www.tecwrk.com

Precision isn't optional in quality-driven environments—it's the foundation of trust. The **QualityPro Calibration Module** ensures every instrument performs with uncompromised accuracy through a fully digital, controlled, and traceable calibration process. To maintain equipment precision and operational reliability, the **Calibration Module in QualityPro QMS** manages the entire calibration lifecycle with complete control and transparency. From equipment registration and parameter definition to scheduling, executing tests, recording results, managing deviations, completing approvals, and issuing certificates, every stage of the calibration lifecycle is fully digitalised within QualityPro—ensuring accuracy, compliance, and complete traceability across the organisation.

As a comprehensive calibration management system, it provides everything you need in one place: detailed equipment records, clearly defined test methods, tolerance limits, calibration frequencies, and structured test groups tailored to each instrument.

During execution, users can capture results in numeric, alphanumeric, or pass/fail formats, log deviations instantly, and raise NCs whenever values exceed allowable limits. A robust approval workflow further reinforces accountability through clearly assigned verifier and approver roles.

By centralising and automating calibration activities end-to-end, QualityPro strengthens your quality control framework. It helps maintain instrument accuracy, minimise variability, support regulatory compliance, and build confidence in every measurement that powers your operations.

Salient Features

- **Intuitive Calibration Dashboard**

A visual dashboard gives you a holistic view of calibration status - upcoming, due, or overdue instruments - so you can prioritise tasks proactively and avoid misses.

- **Role-Based Workflows**

Define and assign roles such as approver, and verifier. Ensure accountability and multi-layer approval during the calibration process for tighter controls.

- **Smart Scheduler & Alerts**

Schedule based on custom calibration intervals. Receive automated alerts for upcoming or overdue tasks - keeping your team on track without manual follow-ups.

- **In-System Test Definitions**

Configure calibration tests by defining parameters like tolerance, test types (numeric, alphanumeric, pass/fail), and acceptable limits.

- **NC / Deviation Handling**

When a calibration test fails, QualityPro can instantly raise a Non-Conformance (NC) and trigger corrective & preventive actions to ensure the issue is addressed.

- **Certificate & Document Repository**

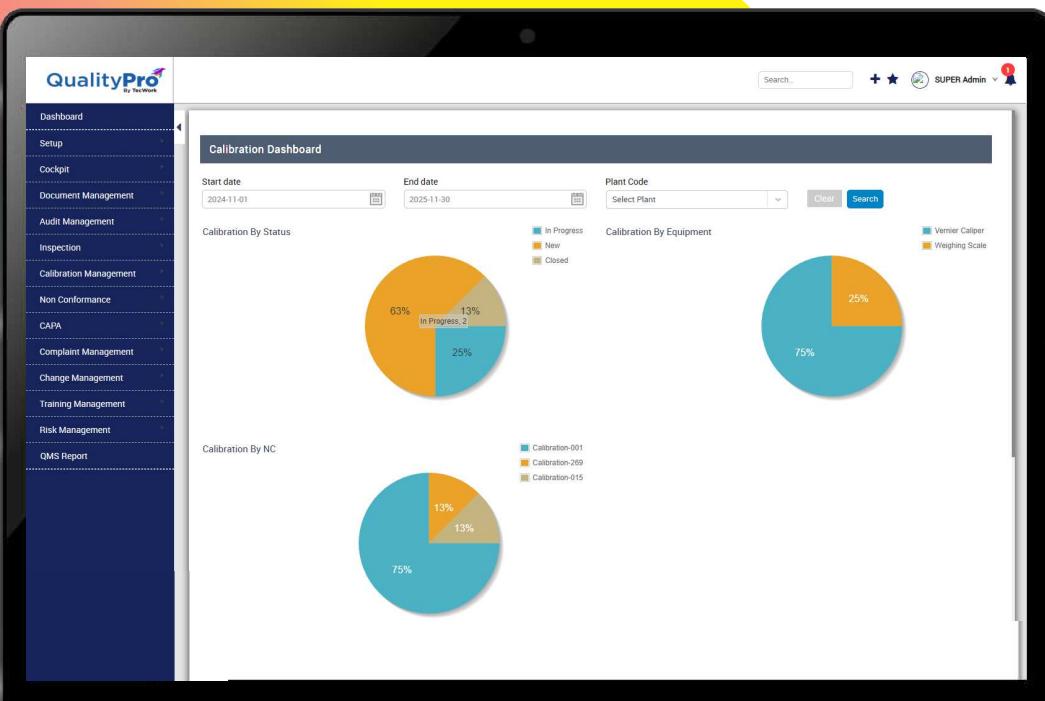

Store all calibration certificates, SOPs, test procedures, and related documents in a central, secure library with version control and quick search capabilities. Link various certifications to equipment and maintain complete documentation for audits.

- **Audit Trail & Traceability**

Capture a full history of calibrations, including who did the calibrations, who verified them, when, and for which equipment. Perfect for internal reviews and external audits.

- **Integrated with QMS Ecosystem**

Seamlessly link with other QualityPro modules — such as NC & CAPA, Document Control, and Change Management — to maintain a unified quality ecosystem

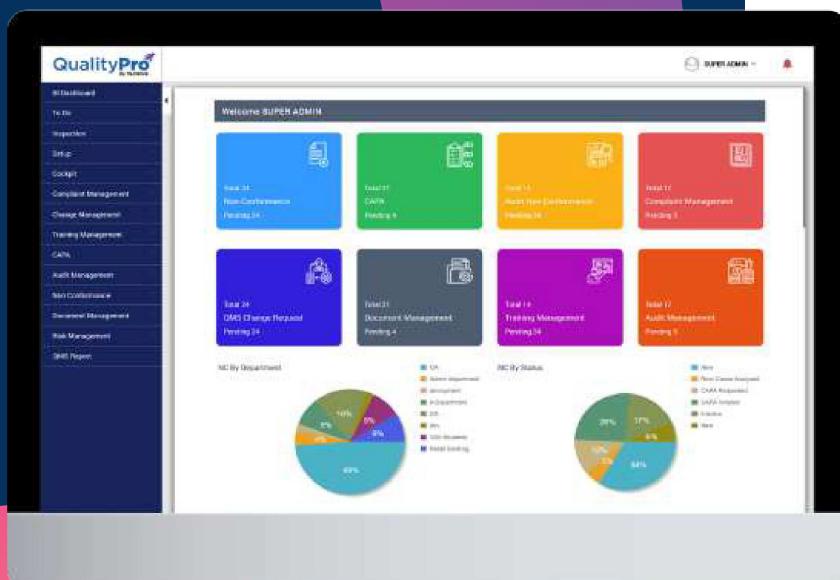

Essential Benefits

Strengthen Quality. Reduce Variability. Inspire Confidence.

With QualityPro's Calibration Module, your organisation gains:

- ✓ Accurate, reliable measurement systems
- ✓ Reduced equipment-related deviations
- ✓ Better audit preparedness
- ✓ Fully digital, paperless workflows
- ✓ Stronger compliance and operational stability

Take control of calibration like never before—empowered by intelligent automation and complete visibility.

About Tecwork

TecWork Global Business Solutions is a startup, where cutting-edge technology converges with business excellence. We are dedicated to empowering businesses through innovative solutions that specialize in and seamlessly align with diverse business objectives like [Quality Management Software](#), [Fleet Management Software](#), [Field Force Management Software](#), [Human Resource Management Software](#), etc.

Our mission is to elevate operational efficiency, ensure compliance, and drive success across a spectrum of industries. With a passion to innovate, commitment to excellence, and a hunger for technological advancement, we are your strategic partner in excelling in the modern business landscape. Join us on the journey to optimize, streamline, and transform your business processes with our state-of-the-art tools.
