**Your Field Force,
Fully in Control.**

Field Force Management
Solution for Sales-Driven
Organizations—
Across Industries,
Across Borders.

• • • • •

When Your Team Is in the Field, You Need More Than a Phone Call.

Field-driven businesses run on people—sales reps, service technicians, delivery personnel, and account managers spread across territories. Managing that movement without the right tools means constant follow-ups, incomplete data, and decisions made on outdated information.

NavigatorPro changes that.

NavigatorPro is a GPS-enabled, mobile-first field force management platform that gives managers complete real-time visibility—and gives reps the tools to stay organized, accountable, and productive every day in the field.

Whether your team is managing accounts across a region or running a door to door sales app-driven operation, NavigatorPro is the field sales app that keeps every rep, route, and result connected.

Everything You Need to Run a High-Performance Field Team

NavigatorPro covers the full field operations lifecycle—
from planning and attendance to execution, reporting, and analysis

Live Location Tracking & Geo-Fencing:

Track your entire field team on a live map. Set territory boundaries and receive instant alerts when reps deviate from planned routes or move outside assigned zones.

Task Management & Visit Scheduling:

Plan, assign, and monitor client visits before reps leave the office. Every check-in is geo-tagged and time-stamped. Outcomes and follow-ups are logged directly from the mobile app.

Tour Planning & Proximity-Based Assignment:

Easily create, organize and oversee tours with smart scheduling. Identify the closest rep to any location instantly, and assign tasks accordingly, thus maximizing productive visits per day while minimizing travel time.

Attendance, Leave & Tour Planning:

Geo-verified clock-in and clock-out from the field. Managers plan and approve tour schedules, track daily activity, and manage leave requests—all in one place.

Order Booking & Expense Management:

Reps book orders, submit digital forms, and log expenses with receipt uploads from their mobile devices. Managers review, approve, and download documents. No paperwork.

Targets, Dashboards & Reports:

Set performance targets by product, customer, or visit count. Monitor progress in real time through a centralized dashboard, without waiting for end-of-week reports

Built for Every Field Team Including the Most Specialized Ones

NavigatorPro serves field-driven organizations across industries. For organizations in pharmaceuticals, medical devices, and healthcare distribution, NavigatorPro includes a specialized configuration '[NavigatorPro Pharma](#)' that comes with workflows purpose-built for the demands of pharma sales teams.

Pharma & Medical Device Configuration

Medical Representatives carry more responsibility than most field roles, as every clinic, hospital, and chemist visit impacts brand performance. The NavigatorPro pharma configuration is designed around these realities.

E-Detailing: Reps present the full product catalogue digitally during visits—zoomable visuals, interactive decks, and accurate product information at every HCP interaction.

Sample Distribution & Prescription

Tracking: Log sample distributions in real time. Track prescriptions at the field level. Every interaction recorded, giving managers accurate HCP engagement data.

Doctor, Hospital & Chemist Visit

Management: Schedule and track visits to doctors, hospitals, and chemists with geo-verified check-ins. Eliminate proxy visits. Keep field activity data audit-ready.

Reporting, Analytics & Order Management:

Reps capture market intelligence and book orders directly from the field, while managers gain real-time visibility through reports and dashboards covering sales activity, order trends, and field performance.

Tour Planning & Deviation Management:

Plan and approve medical rep tours in advance. Manage deviations and leaves within the platform. Full manager visibility at every stage.

Why Organizations Choose NavigatorPro

Complete Field Visibility: Know where your team is, what they are doing, and how they are performing, in real time, from any device.

Reduced Operational Friction: Eliminate manual logs, paper-based expense claims, and disconnected reporting. Everything your team does in the field flows directly into the system.

Faster, Better-Informed Decisions: With live dashboards and on-demand reports, managers spend less time chasing updates and more time making decisions that move the business forward.

Accountability without Micromanagement: Geo-tagged proofs, verified attendance, and structured workflows build accountability into daily operations, without creating an environment of excessive oversight.

Scalable across Teams and Territories: Whether you manage 10 field reps or 1,000, NavigatorPro scales with your operations without adding complexity.
